SKILLS

Programming Languages: Java, JavaScript

Frontend: HTML5, CSS3, React, Tailwind CSS

Backend: Spring Boot, RESTful APIs

Databases: MySQL

Core Concepts: Object-Oriented Programming, DBMS, Computer Networks

PROJECTS

Healthcare Database System (CarePass)

Jan 2025 – Mar 2025

HTML, CSS, JavaScript

Live Project

- Designed and developed a mobile-responsive healthcare record system enabling secure, instant patient data access via NFC.
- Implemented **NFC-based authentication** and **role-based access control** to ensure data privacy and security.
- Optimized database queries and integrated **Google Apps Script** to enhance performance and scalability.

INTERNSHIPS

Python Programming Intern

Feb 2024 – Mar 2024

IPCS Global, Kozhikode, Kerala

- Worked on Python fundamentals including file handling, debugging, and control structures.
- Developed small-scale applications, improving logical thinking and problem-solving ability.
- Collaborated with frontend teams to support backend logic and data flow.

Data Analyst Intern

Jul 2025

Robomatiic, Coimbatore, Tamil Nadu

- Analyzed and visualized sales data using Excel (Pivot Tables) and Python libraries such as Pandas, NumPy, and Matplotlib.
- Extracted actionable insights and prepared analytical reports for business decision-making.

Full Stack Web Development Trainee

Jan 2026 – Present

Tap Academy, Bangalore, Karnataka

- Undergoing intensive training in Java, JavaScript, and full-stack application development.
- Learning core computer science concepts including OOP, JVM architecture, and system fundamentals.

ACHIEVEMENTS

- **Be10x AI Workshop-**, attended and interactive focused covering foundational concepts in artificial intelligence, tools like ChatGPT prompt engineering and real world applications.
- **IBM Skills Build-**, Gain foundational knowledge of generative AI concepts, applications, and ethical considerations, including how generative model text, images and other content.
- **MongoDB University/ Credly-**, Learned core concepts of MongoDB, including NoSQL databases, document-based data models, CRUD operations, and basic database managements using MongoDB.

EDUCATION

Dhanalakshmi Srinivasan College of Engineering

2022 – 2026

B.Tech in Artificial Intelligence and Data Science — CGPA: 7.78

India

TRKHSS Vaniyamkulam

2020 – 2022

Bio Science — Percentage: 70%

India
